Description

Electric Outboard Motor 20 lbs

The perfect Electric Outboard Motor for KAYAKS and small BOATS!

The 20 lbs motor is the baby of all electric outboards. It's designed especially for kayaks, small dinghies and inflatable boats.

It has an adjustable transom-mount fitting for easy attachment. There is a high and low speed control, a forward and reverse switch. The two-blade propeller is a weedless design. It's a lightweight motor offering the ultimate in portability and can be used in saltwater and freshwater.
