BIC Boat Sportyak 213 Dinghy Boat & Electric Motor for sale

Exceptionally light, solidly built, incredibly long-lasting and stable, **BIC boats** have built a solid reputation in the world of leisure boating.

Light weight, easy to transport, giving you excellent glide when you row, it can also be fitted with either a thermal or electric motor.

From carrying men and equipment to an anchored boat, to getting out to the best fishing spots, to being a great toy for the kids...

There are almost no limits for this super safe and versatile boat !

Specifications:

Length : 2.13m - 7'

Width : 1.15m - 3'9"

Weight : 19 Kg - 42lbs

Capacity : 2 pers./374 lbs

Recommended engine : electric or internal combustion, maxi. weight 12 kg

Accessories included with the dinghy:

2 oars, 3 rowlocks, 3 rowlocks brackets, 1 rope

Features:

Exceptional stability

The catamaran hull shape of the Sportyaks 213 and 245 gives them much more stability than all flat or V hulls. This is a major advantage for hunting, fishing or ferrying equipment over to an anchored boat.

Light weight

The Sportyak 213 and the Sportyak 245 are light which is an essential characteristic for a boat that is most of the time carried by hand and loaded onto roof racks. It is thanks to their double hull structure that even though they are very light, there has been no compromise on safety aspects.

Solidity

The toughness of polyethylene

The Sportyak 213 and the Sportyak 245 are made of polyethylene which makes them virtually indestructible. You don't have to worry about leaving them in dinghy racks or on the beach. UV rays, salt and every day impacts have no effect on them.

When no longer in use, these boats are entirely recyclable.
