Description

8 person Polyethylene Plastic Boat

@ Rs. 1,25,000/- (Inclusive of GST @ 28%)

The PE-400 is a solid boat for carrying people or luggage, the ideal boat of choice as rescue boat or an affordable recreational boat.

This boat is perfect for tenders or as a recreational boat made out of tough and reliable plastic.

A PE boat can be taken into shallow, rocky waters with full confidence due to its impact resistant properties.

Polyethylene is extremely impact-resistant, and poly boats are virtually indestructible in the normal course of recreational boating.

Waxing and polishing are maintenance chores of the past, when you own a plastic boat. A scrub brush and soapy water is all you'll ever need to get the boat looking as ship-shape as possible.

This boat's transom is prepared to handle an outboard motor according to the boat engine capacity.

PE boats are rotationally moulded in polyethylene. The production method and the structure of the boats makes them highly robust and durable

The structure and design of the boats make them stable and safe.

The boats require minimal maintenance. This gives users more time to enjoy "simple boating".

Can be fitted with either petrol outboard motor max 15 HP or as electric motor boat fitted with battery operated Electric Trolling Motors.

Available in YELLOW and BLUE colours. **One pair of oar included.**
