Description

VIEW Inflatable Kayak 1 person

Take your kayaking experience to a new level, discover more than you thought possible with the new View inflatable kayak from Aqua Marina.

The clue is also in the name - this recreational kayak features a unique see-through viewing port in the base which allows you to see everything that you cruise over, giving a personal view to your ride. Designed to move calmly and easily across the water, the View is best suited to recreational use and prefers flat water and lakes.

This model of the View is intended for a single passenger, but check out the larger double seat View for a kayaking experience you can share.

Included with this kayak is a dual oar paddle, high back seat and foot brace, hand pump, carry bag, pressure gauge, repair kit and user guide.
